

价格表是什么？

由于各种原因，同一个产品卖给不同的客户价格是不一样的，价格可能会高一些，可能会低一些。根据市场、成本等其他原因，会经常修改价格，而对于长期合作的大客户价格不可以经常改动。

因此我们就创建了价格表，每一个客户都关联自己的价格表。在创建销售订单时，产品价格会根据关联的价格表自动显示。

What is a price list?

Due to various reasons, the price of the same product may vary for different customers. The price could be higher or lower. Prices are often modified based on factors such as the market and costs. For long-term cooperative customers, the prices cannot be frequently changed.

Therefore, we have created a price list. Each customer is associated with their own price list. When creating a sales order, the product price will be automatically displayed according to the associated price list.

价格表的详细解释

1、产品价格表的设置

应用于：当前使用产品变体。产品的规格不同价格不同，因此要选择：应用于产品变体。

产品变体：选择要添加价格的产品具体规格。

固定价格：产品的售卖价格（最常使用①）

公式：以某一个价格表为基础，通过公式给产品打折。（不常使用，且只在 odoo 系统的销售订单中生效）

Variant: CANTALOUPE (中国哈密瓜) (CTN(4PC))

Apply On: All Products Product Category Product Product Variant

Min. Quantity: 0.00

Start Date:

End Date:

Product Variant: CANTALOUPE (中国哈密瓜) (CTN(4PC))

Price Computation: Fixed Price Percentage (discount)

Fixed Price: 0.00

Apply On: All Products Product Category Product Product Variant

Min. Quantity: 0.00

Start Date:

End Date:

Product Variant: CANTALOUPE (中国哈密瓜) (CTN(4PC))

Price Computation: Fixed Price Percentage (discount) Formula

Based on: Other Pricelist

Other Pricelist: 鼎盛NAN LI (AED)

New Price = Other Pricelist - Price Discount 0.00% + 0.00

2、阶梯价格

销售--产品--产品变体--阶梯价格

某个产品变体规格在系统中所有价格表中的价格总览，可在此批量修改产品价格。

Sales Orders To Invoice Products Reporting 产品销量分析

Price For App (AED)	Variant: APPLE FUJI (红富士苹果) (CTN(9KG))	APPLE FUJI (红富士苹果) (CTN(9KG))	0.00	95.00	
MARKET CUSTOMERS (AED)	Variant: APPLE FUJI (红富士苹果) (CTN(9KG))	APPLE FUJI (红富士苹果) (CTN(9KG))	0.00	90.00	

3、同步到电商价格表

在销售模块修改了价格表中的产品价格，保存后仅在销售模块中的销售订单中生效。只有点击了“**同步电商价格表**”，对应的电商价格表中的信息才会更新，小程序上面的产品价格才会更新。因此每次修改/新增产品价格后，必须点击“同步电商价格表”，保证小程序端与后台的产品价格是一致的。

Detailed explanation of the price table

1. Setting of product price table

Applicable to: Current use of product variants. The prices vary depending on the product specifications. Therefore, select: Applied to product variants.

Product variants: Select the specific specifications of the product to add price.

Fixed price: The selling price of the product (most commonly used ①)

Formula: Based on a certain price table, apply a discount to the product through a formula. (Not commonly used, and only takes effect in the sales orders of the Odoo system)

2. extra price

Sales - Product - Product variants - extra price

An overview of all price table prices for a certain product variant specification in the system. This allows for batch modification of product prices.

3. update eshop pricelist

After modifying the product price in the sales module, save it. The changes will only take effect in the sales orders of the sales module. Only by clicking "update eshop pricelist" will the information in the corresponding eshop pricelist be updated, and the product prices on the mini-program will be updated. Therefore, after each modification or addition of product prices, you must click "update eshop pricelist" to ensure that the product prices on the mini-program and the backend are consistent.
